All statements, other than statements of historical facts, regarding our business strategy, future operations, financial condition, estimated revenues, projected costs, projected synergies, prospects, plans and objectives of management, as well as information concerning expected actions of third parties, are forward-looking statements. These statements are subject to a number of risks and uncertainties that could cause results to differ materially from those anticipated as of the date of this presentation. Important factors that could cause our actual results to differ materially from those expressed or implied herein include, without limitation: our ability to manage and otherwise comply with our covenants with respect to our significant outstanding indebtedness or maintain our credit ratings; changes and developments in external competitive market factors, such as introduction of new product features or technological developments; development of new competitors or competitive brands or competitive promotional activity or spending or industry consolidation; the cost and effect of unanticipated legal, tax or regulatory proceedings or new accounting policies, laws or regulations (including environmental, public health and consumer protection regulations); seasonality of our products and changes in consumer demand for the various types of products we offer resulting in the loss of, or a significant reduction in, sales to significant retail customers; our ability to develop and successfully introduce new products, protect our intellectual property and avoid infringing the intellectual property of third parties; public perception regarding the safety of our products, including the potential for environmental liabilities, product liability claims, litigation and other claims; unfavorable developments in the global credit markets; the impact of overall economic conditions, terrorist attacks, acts of war or other unrest in international markets on consumer spending; fluctuations in commodities prices, supply shortages, the costs or availability of raw materials or terms and conditions available from suppliers; changes in the general economic conditions in countries and regions where we do business, such as stock market prices, interest rates, currency exchange rates, inflation and consumer spending; our ability to successfully implement manufacturing, distribution and other cost efficiencies and to continue to benefit from our cost-cutting initiatives; the impact of expenses resulting from the implementation of new business strategies, divestitures or restructuring activities; our ability to integrate, and to realize synergies from, the combined businesses of Spectrum Brands, Inc. and Russell Hobbs, Inc.; our ability to identify, develop and retain key employees; unfavorable weather conditions or climate change and various other risks and uncertainties, including those discussed herein and those set forth in our filings with the Securities and Exchange Commission (“SEC”).

We also caution the reader that undue reliance should not be placed on any forward-looking statements, which speak only as of the date of this presentation. We undertake no duty or responsibility to update any of these forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect actual outcomes. Additional factors that may affect future results and conditions are described in our filings with the SEC, which are available at the SEC’s web site at www.sec.gov or at Spectrum Brands’ website at www.spectrumbrands.com. The information contained in this presentation is summary information that is intended to be considered in the context of our SEC filings, and other public announcements that we may make, by press release or otherwise, from time to time. In addition, information related to past performance, while helpful as an evaluative tool, is not necessarily indicative of future results, the achievement of which cannot be assured. Reconciliation of Non-GAAP Financial Measurements

Management believes that certain non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Excluding the impact of current exchange rate fluctuations may provide additional meaningful reflection of underlying business trends. In addition, within this presentation, including the tables that follow, reference is made to adjusted earnings before interest, taxes, depreciation and amortization (EBITDA), free cash flow and adjusted gross profit.

Adjusted EBITDA is a metric used by management and frequently used by the financial community which provides insight into an organization's operating trends and facilitates comparisons between peer companies, because interest, taxes, depreciation and amortization can differ greatly between organizations as a result of differing capital structures and tax strategies. Adjusted EBITDA can also be a useful measure of a company's ability to service debt and is one of the measures used for determining the Company's debt covenant compliance. Adjusted EBITDA excludes certain items that are unusual in nature or not comparable from period to period.

In addition, the Spectrum Brands' management uses adjusted gross profit as one means of analyzing the Spectrum Brands' current and future financial performance and identifying trends in its financial condition and results of operations. Management believes that adjusted gross profit is a useful measure for providing further insight into Spectrum Brands' operating performance because it eliminates the effects of certain items that are not comparable from one period to the next.

Also, management believes that free cash flow is useful to both management and investors in their analysis of Spectrum Brands' ability to service and repay its debt and meet its working capital requirements. Free cash flow should not be considered in isolation or as a substitute for pretax income (loss), net income (loss), cash provided by (used in) operating activities or other statement of operations or cash flow statement data prepared in accordance with GAAP or as a measure of profitability or liquidity. In addition, the calculation of free cash flow does not reflect cash used to service debt and therefore, does not reflect funds available for investment or discretionary uses.

Spectrum Brands provides this information to investors to assist in comparisons of past, present and future operating results and to assist in highlighting the results of on-going operations. While Spectrum Brands' management believes that non-GAAP measurements are useful supplemental information, such adjusted results are not intended to replace the Spectrum Brands' GAAP financial results and should be read in conjunction with those GAAP results.
